

**Amendments to the Abstract:**

A backlight module (3) includes a light source group (31) and a light guide plate (32). The light source group includes at least a light source source (~~not labeled~~), and the light guide plate has a light input surface (321) for receiving light and a light output surface (322) for emitting light. The light source group faces the light input surface, which is ~~[[a]]~~ curved ~~and~~ such that its curvature matches with the light distribution of the light source group.
